

Whitepaper 2022

Crypto with a Purpose.

*Crypto with a Purpose.
GivingVerse allows you to earn automatic
rewards and make a difference.*

*By buying and holding, you automatically
contribute to planting (real) trees and
growing the the GivingVerse forest.*

01. Our Story

Our Why

We are a team of blockchain enthusiasts, dreamers and doers who care about people and the future of our world. We launched GivingVerse as a platform that will allow others to invest and earn rewards while giving back. We believe that Decentralised Finance is the future of monetary exchange and cryptocurrency can be used as a force for good.

02. The Team

Who we are

The GivingVerse team is made up of dreamers, doers and builders. With experience in business, finance, development, design and marketing.

03. Our Vision And Mission

GivingVerse's vision is to transform philanthropy through blockchain technologies.

Profit with purpose is the new social transformation that would make the most social impact by allowing people to give towards charities and causes while earning rewards. It is a positive feeding loop: Doing good, earning automatic crypto rewards, doing more good.

We have a goal of raising funds on an ongoing basis to be donated to community decided worthy causes, with tangible results.

GivingVerse's mission is to leverage blockchain technologies to grow a global movement that links decentralised finance and profitability with positive social impact.

04. The GivingVerse Ecosystem

04.01 Blockchain

Blockchain technology has the ability to revolutionise philanthropy. With the GivingVerse token at the heart of the ecosystem, we aim to make the act of giving to charities both fulfilling and financially rewarding. This will be done through our tokenomics and staking mechanisms that allows investors to earn rewards automatically.

The token is a community-driven, frictionless yield-generating, utility token created on the Polygon Smart Chain (with eventually bridging to ETH and Finance).

All of our decentralized applications (Dapps) will be designed to support our native utility GivingVerse token through reflections and yield earning opportunities.

04.02 The GivingVerse Token

At the heart of the ecosystem is the GivingVerse token. The GivingVerse token is a revolutionary cryptocurrency on the Polygon blockchain that combines passive earning and social impact.

When the GivingVerse token is bought or sold, a percentage of the transaction fee, is allocated between the platform, rewards for holders and social impact projects decided on by the community.

GivingVerse is an ERC-20 token on the Ethereum Network, with future bridges to other chain networks. GivingVerse tokens can be purchased on Decentralised (DEX) and Centralised Exchanges (CEX). DEX and CEX exchanges by various providers.

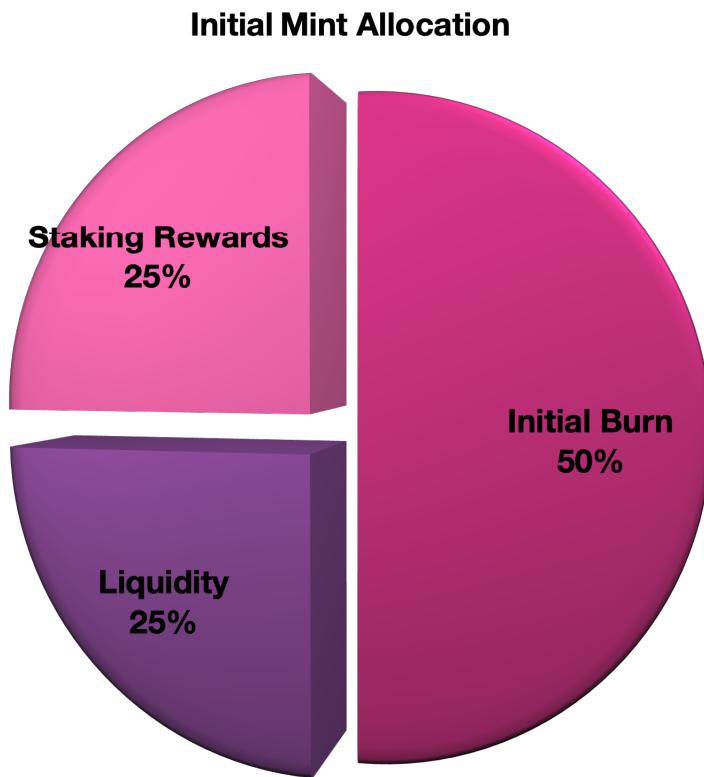

04.03 Tokenomics

The GivingVerse token is summarised by Earn, Burn and Give.

The token has a built in incentive for holders in the form of automatic rewards earned from a percentage of the transaction fees which is shared proportionately to all token holders. The token also has an automatic donation wallet for a community agreed social impact project or charity through the transaction fees. Buybacks and burns contribute to the strength of the token price.

04.04 Token Supply

The GivingVerse Token has a fixed maximum supply of 1 Quadrillion tokens. These tokens will be minted (created) at the inception of the Token Smart contract. No more tokens can be minted after this initial mint. The opening price of the token will be determined once liquidity is raised through pre-sales. The price of the token is dependent on how much liquidity is raised.

Allocation of the minted tokens:

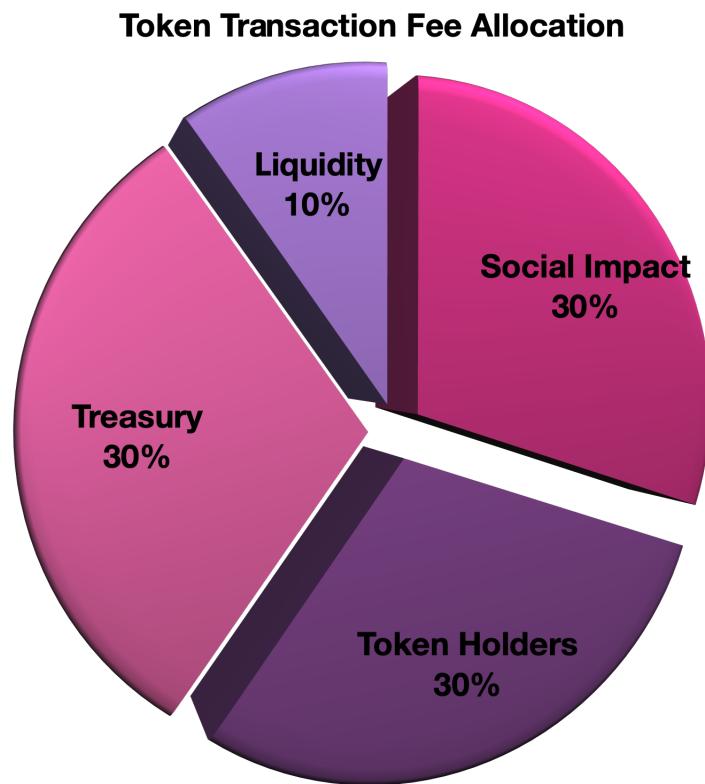

- Total supply at launch 1,000,000,000,000,000 (1 Quadrillion)
- Pre-sale allocation 400,000,000,000,000
- Initial burn 412,002,373,603,282
- 25% used to create a liquidity pair (Token/MATIC and Token/USDC) in order to facilitate buying and selling of the token
- 25% will be used for staking rewards

04.05 Token Fee Allocation

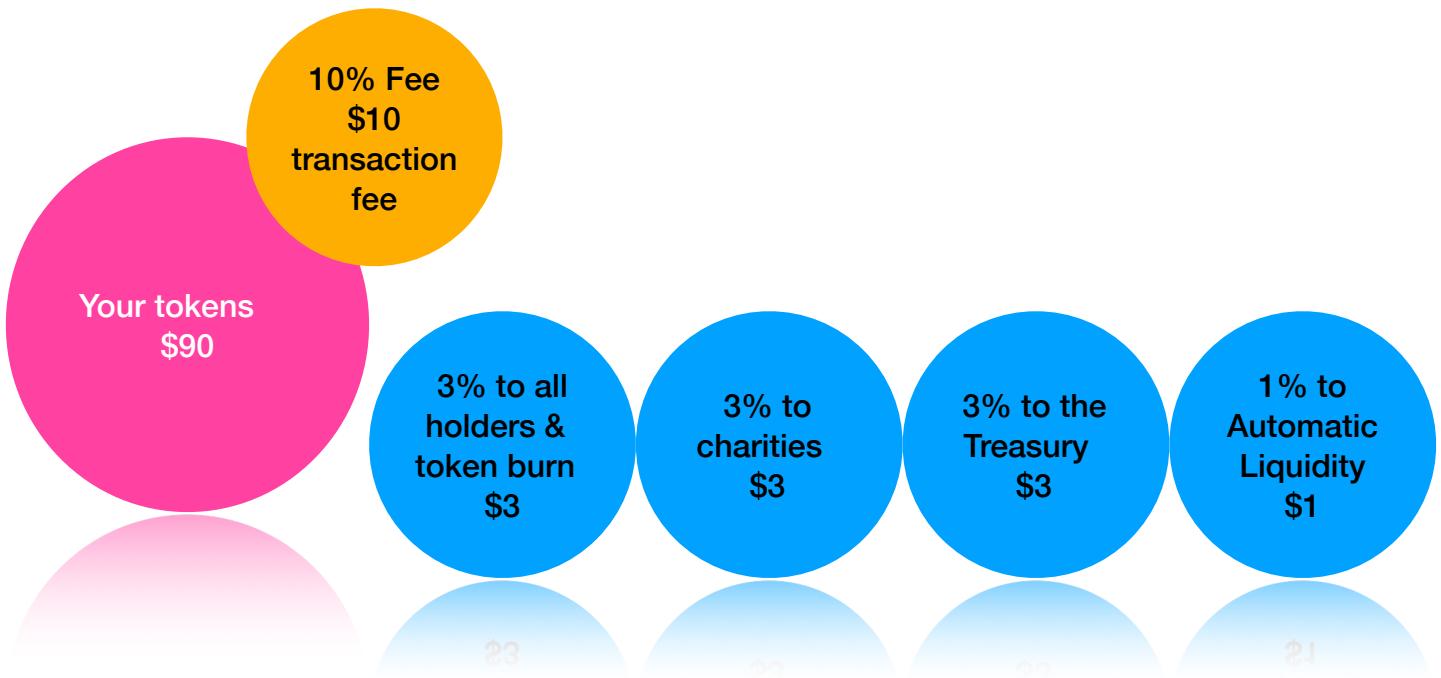

The GivingVerse token has an automatic transaction fee of 10% on all transactions. The transaction fee is divided as follows:

- 3% reflections tax goes directly to each and every holder of the GivingVerse token proportionately from every transaction on the given exchange used. For GivingVerse token holders on a CEX (Centralised Exchange) that supports this mechanic, their tokens

- will be snapshotted daily, and an averaged reward will be disbursed on the 10th of every month
- 1% of tax goes directly towards automatic liquidity and burns of the token
 - 3% goes directly to social impact charities, causes and projects as voted on by the community every month
 - 3% goes towards the treasury for development, marketing, buyback & burns

04.06 Example transaction flow when purchasing \$100 of GivingVerse Token

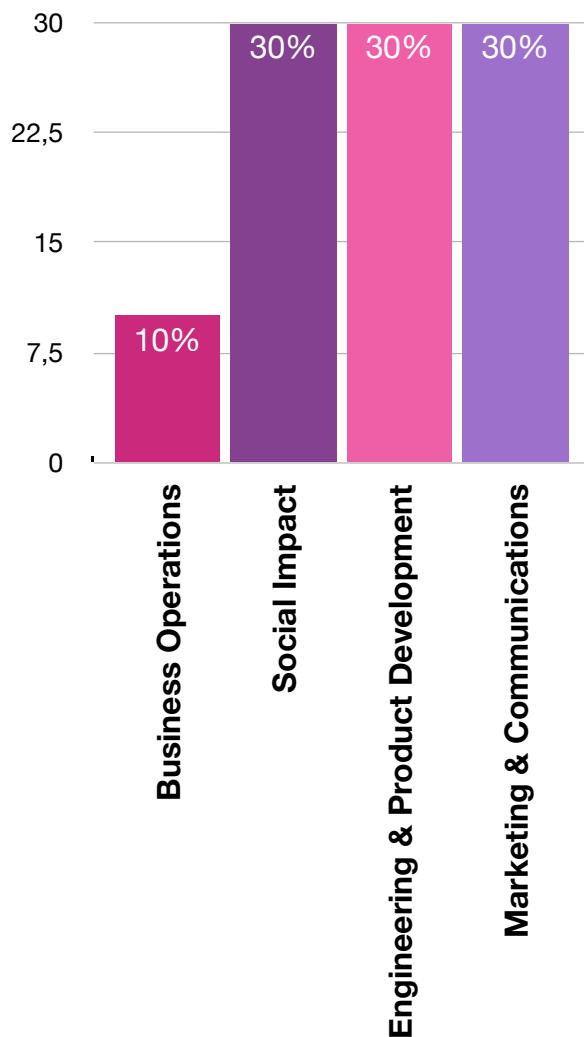

04.07 Token Extraction

Once the project has reached maturity and utility via NFT collections and staking, 60% of accumulated Liquidity tokens (both GivingVerse tokens and Ethereum coins) will be extracted on a monthly basis and disbursed to selected charities and causes, engineering and product development, marketing, business operations, stability reserve, giveaways and liquidity. These disbursements will be announced and visible on the blockchain and transparent to the community.

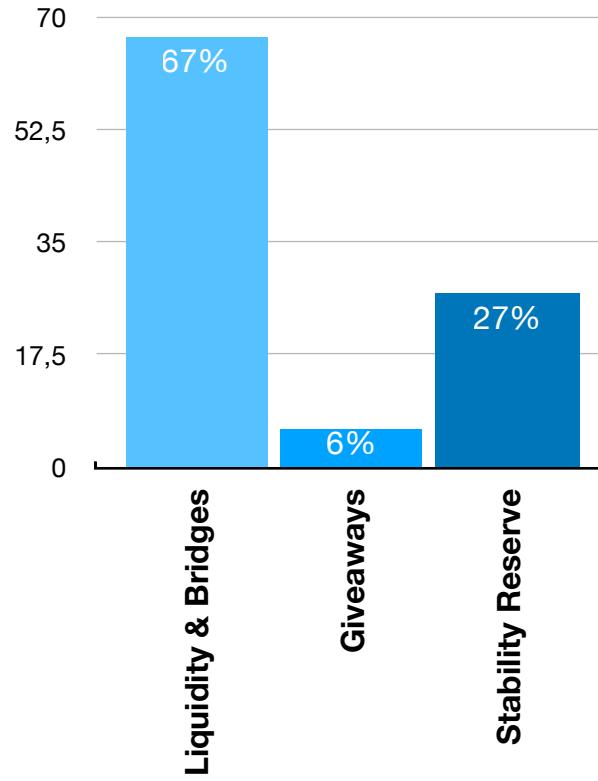

Any excess liquidity not needed for operational needs will be locked in PinkSale, and results will be shared with the community.

The extracted tokens will be divided as follows:

Extracted GivingVerse Token

Extracted FTM Token

04.08 Liquidity

The initial Liquidity Generation Event will be done via a pre-sale campaign through a specific crowdsourced Launchpad, VC Fund raising or a pre-sale campaign such as PinkSale. The raised funds will be used towards the liquidity for the token to enable the market to buy and sell the token. The initial token liquidity pool will be locked under PinkSale DeFiLaunch Certified Liquidity Locker, ensuring safety and security for our community.

04.09 Sales Channels - Decentralised Exchange

The token will be available for purchase on Decentralised Exchanges (DEX) such as Quickswap. Quickswap is a Smart Chain based Decentralized Exchange (DEX) for swapping ERC-20 tokens. To facilitate GivingVerse's initial public offering. Quickswap offers the ability to exchange MATIC or USDC for the GivingVerse token. The token will also be listed on other major CEX and DEX exchanges in the near future.

04.10 Polygon Blockchain

GivingVerse will utilise technical frameworks provided by Polygon (previously Matic), a leading Ethereum Layer 2 solution provider. Polygon provides solutions to crucial technical limitations of scalability and cost of transactions that have been roadblocks in the path of building on the Ethereum blockchain.

By building on Polygon, GivingVerse will be setting a foundation that can scale to the mass adoption user levels anticipated over time, while reducing transaction times and costs to a near-zero level, enabling our vision to be executed more rapidly and robustly.

04.11 Gnosis Safe Multisig

As an added security feature for the token/liquidity pool of the

GivingVerse token, the Gnosis Safe Multisig platform will be implemented. The Gnosis Safe Multisig is a smart contract wallet that requires a minimum number of people to approve a transaction before it can occur. Example: A transaction will not be approved until 2 out of 3 designated people digitally sign the transaction as approved.

04.12 Bridges to Other Blockchains

GivingVerse Tokens will begin on the Polygon Network, but will then be available on other blockchain networks to expand GivingVerse's reach and impact across the crypto space.

04.13 Sustainability

The GivingVerse token has zero mining, and a carbon-negative footprint.

05. Earning Rewards

There will be several ways for token holders to earn a yield in the form of rewards on their tokens.

05.01 Automatic Rewards (Passive)

3% of all transaction fees will go directly to each and every holder of the GivingVerse token proportionately from each and every transaction on the given decentralised exchange used. For GivingVerse token holders on a CEX (Centralised Exchange) that supports this mechanic, their tokens will be snapshotted daily, and an averaged reward will be disbursed on the 10th of every month.

05.02 Staking Vault Rewards (Passive)

The GivingVerse platform will include the ability to stake GivingVerse tokens into a staking contract in order to earn GivingVerse token rewards.

For staking of the token, holders receive a yield calculated on APY. APY (Annual Percentage Yield) calculations are based on rewards from the last 7 days, compounding once per day. Fees and locking bonuses are not included in this calculation. This value will fluctuate as data is collected.

All figures are estimates provided for convenience only, and by no means represent guaranteed returns.

Staking is based on Game-Theory mechanics. (Example <https://stake.elongate.cc/elon-gate-vault>)

05.02.01 Staking Fees:

- 3% Reward pool fee on entry and exit
- 2% GivingVerse Social Impact fee on entry and exit
- 0.75% Platform fee on exit and entry

- Entry and exit vault fees are added directly to the staking pool rewards.
- All rewards are auto-compounded.

05.02.02 Staking Conditions

- Normal transaction fees are NOT applied when entering and exiting the vault.
-
- The GivingVerse vault distributes rewards every time a user enters or exits the vault.
-
- The team will also manually distribute rewards if there hasn't been a distribution in 24 hours.
-
- The early withdrawal fee is 15% + 5.75% normal exit fee (20.75% total)

06. The Community

06.01 GivingVerse DAO

The GivingVerse DAO is a community and platform allowing token holders to collectively vote on the platform and social impact charities and causes the platform should donate to. All token holders are automatically members of the DAO and able to vote.

06.01 GivingVerse Social Media

GivingVerse has a forum on Discord to allow community members to come together and receive all the latest news and updates about the GivingVerse platform.

07. Roadmap

07.01 Development Milestones for Phase 1

Q3 2022

- Q3 2022 - Initial Idea, Research and Project Planning
- Q3 2022 - Project Planning team created
- Q3 2022 - Whitepaper, Tokenomics & Presentation Deck created
- Q3 2022 - Formation of the technical team for the Project
- Q3 2022 - Register Domain
- Q3 2022 - Setup branding graphics
- Q3 2022 - Setup social media handles
- Q3 2022 - Setup pre-launch website
- Q3 2022 - Formation of the marketing team and legal team.
- Q3 2022 - Roadmap created
- Q3 2022 - Github created
- Q3 2022 - Start social media marketing, ICO promotion and Community Support
- Q3 2022 - Create Digital Wallets (Metamask)
- Q3 2022 - Start of smart contract development, DAO and multisig
- Q3 2022 - End of development
- Q3 2022 - Complete contract audit
- Q3 2022 - Testing
- Q3 2022 - Alpha version of Platform. Technical whitepaper and Pre- ICO.
- Q3 2022 - Liquidity generation through private token pre-sale round.
Goal to create 2500-5000 token holders and raise \$3.2 million

Q4 2022

- Q4 2022 - ICO Opens
- Q4 2022 - List on coinmarketcap, dappradar, coingecko and other exchanges
- Q4 2022 - Crowdsale ends
- Q4 2022 - Postsale
- Q4 2022 - Platform launches
- Q4 2022 - Listing on exchanges

07.02 Future Development Phase 2

Q2 2023

Q1 2023 - GivingVerse Rewards Dashboard to track tokens, rewards & other statistics on the platform

Q1 2023 - Social Impact Intelligence - a transparent dashboard to show the statistics and results of selected Social Impact projects. Charities and organisations will be able to post updates and information on how the donations were used and also be able to motivate new proposals for funding

Q1 2023 - Launch NFT Token Collection 1 - 80% of Revenue from NFT collections will go towards charitable donations. The NFTs will also grant access to the other parts of the future GiveVerse ecosystem

Q1 2023 - Launch NFT Staking

Q4 2023

Q2 2023 - Launch GivingVerse Swap to enable low-fee swaps

Q2 2023 - Launch cross-chain to other blockchains

Q2 2023 - Launch NFT Collection 2

Q2 2023 - GivingVerse & NFT Merch will be sold with 80% of Revenue going towards charitable donations

07.03 Future Development Phase 3

Q1 2024

Q2 2023 - Launch GivingVerse Metaverse - will allow GivingVerse NFT holders to claim their space in the GivingVerse and watch as their personal forest grows. This will be tied to real world benefits

Q2 2023 - Begin development of GivingVerse GameFi

Q2 2023 - GivingVerse Charity - a dynamic fundraising contract that automatically disburses to crypto charity wallets we have partnered with.

08. Working Together

08.01 Our Identified Sponsorship & Charity Partners

GivingVerse intends to engage with strategic collaborators whose aims align with ours and identify charities and organizations who will receive donations.

Some partners and organisations we have identified to work with:

- Trees for the Future - GivingVerse will partner with a real-tree-planting organization, Trees for the Future, to plant real trees on Earth. A percentage of fees earned from the GivingVerse eco-system is donated to Trees for the Future by creating real tree planting orders. A live dashboard with the number of trees planted is kept updated.

09. Disclaimers

09.0.1 White Paper Disclaimers

The whitepaper provides information and material of general nature. You are not authorized and nor should you rely on the whitepaper for legal advice, business advice, or advice of any kind. Do your own research, and consult experts where appropriate.

Information Published in the Whitepaper

You act at your own risk in reliance on the contents of the whitepaper. Should you decide to act or not act you should contact a licensed attorney in the relevant jurisdiction in which you want or need help. In no way are the contributors to the whitepaper responsible for the actions, decisions, or other behavior taken or not taken by you in reliance upon the whitepaper. You are not authorized and nor must not should you rely on the whitepaper for legal advice, business advice, or advice of any kind.

Involvement Risks

The team does not recommend that any cryptocurrency should be bought, sold, or held by you. Do conduct your due diligence and consult your financial advisor before making any financial decisions. By purchasing GivingVerse, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the token “as is” and is not required to provide any support or services. You agree that by purchasing or exchanging GivingVerse tokens you may not claim any tax, fee, reward or any transaction or activity from GivingVerse, nor any of the GivingVerse team members, nor any other third-party. Any functionality of the GivingVerse application, the GivingVerse Token as well as the GivingVerse Project mentioned within the present whitepaper is of purely technical nature and not related to any legal claim of an GivingVerse token holder.

Compliance with Tax Obligations

The team does not guarantee compliance with any country across the world. Always make sure that you comply with your local laws and regulations before you make any purchase.

No Warranties

The whitepaper is provided on an “as is” basis without any warranties of any kind regarding the whitepaper and/or any content, data, materials, and/or services provided on the whitepaper.

Limitation of Liability

Unless otherwise required by law, in no event shall the contributors to the whitepaper be liable for any damages of any kind, including, but not limited to, loss of use, loss of profits, or loss of data arising out of or in any way connected with the use of the whitepaper.

Future Statements

There may be matters in this whitepaper that are forward-looking statements. Such statements are subject to risks and uncertainty. Participants are cautioned not to place undue reliance on these forward-looking statements. The actual results or events that transpires afterwards may be different from what is implied here. The team shall not guarantee the accuracy of the forward-looking statements outlined in this whitepaper.

09.0.2 Staking Disclaimers

Reward rates are subject to change and compliance with GivingVerse’s terms and conditions, which are available upon request and within our posted Disclaimer. Further details are available [here](#).

By proceeding, you agree to understanding that the cryptocurrency markets are unpredictable and volatile in nature, and GivingVerse does not guarantee that you will receive Staking rewards, any specific reward, or any staking return over time.

By proceeding you agree to hold GivingVerse, and all of its officers and employees harmless for any and all liabilities arising out of any error, issue, or malfunction in the staking platform technologies, programming, or any other functionality.

Your staked digital assets are not covered by insurance against losses nor are your digital assets covered by any international, national, federal, state, or local deposit insurance or investor protections.

I agree to these terms and conditions and understand that I am responsible for doing my own research!

09.0.3 Token Disclaimers

The GivingVerse tokens aren't meant to represent securities in any jurisdiction. This white paper does not represent a prospectus or supply document of any kind and isn't meant to represent a proposal of securities or a solicitation for investment in securities in any jurisdiction.

The information set in the Whitepaper might not be exhaustive and isn't meant to imply any elements of a contractual relationship. While every effort has been made to ensure that any material in this whitepaper is accurate and up to date, however, such material in no way is to be understood as advice. GivingVerse doesn't guarantee, and refrains from any legal liability whatsoever arising from or connected to, the exactness, dependability, prevalence, or completeness of any material contained in this white paper.

Contributors and potential GivingVerse token holders must get independent professional advice before moving into any commitment or contract. The material in this white paper is solely revealed for reference purposes alone. GivingVerse doesn't offer any opinion on any recommendation to buy, sell, or otherwise interact with GivingVerse tokens and therefore the truth of presentation of this study shall not type the idea of, or be relied upon in reference to, any contract or contribution call.

No person or organization must enter into any contract or binding legal commitment in relevance to the purchase and sale of GivingVerse tokens, and no crypto currency or alternative variety of payment is to be accepted on the premise of this study alone. GivingVerse Tokens don't represent tokens of any country in any type whatever.

GivingVerse Tokens don't hold price in GBP, USD, EUR or the other fiat currency.

No Advice

No information in this Whitepaper should be considered to be business, legal, financial or tax advice regarding GivingVerse, the Distributor, the Gives associated tokens, the GivingVerse Token Sale, the GivingVerse Wallet, and the GivingVerse Exchange (each as referred to in the Whitepaper). You should consult your own legal, financial, tax or other professional adviser regarding GivingVerse and/or the Distributor and their respective businesses and operations, the GivingVerse tokens, the GivingVerse Token Sale, the GivingVerse Wallet, and the GivingVerse Exchange (each as referred to in the Whitepaper). You should be aware that you may be required to bear the financial risk of any purchase of GivingVerse tokens for an indefinite period of time.

Limitation of Liability

In no event shall GivingVerse, members of GivingVerse staff, contractors, or volunteers be liable for: Any lost profits, lost savings or incidental, indirect, special or consequential damages, arising out of your use or inability to use the services or products offered by GivingVerse or the breach of any of these Terms by any third party;

Any security risk such as hacker attacks, loss of password, loss of private key, or similar. Mistakes or errors in code, text, or images involved in the sale, any losses resulting from the volatility in pricing of GivingVerses in any countries and crypto currency exchanges. This website and the GivingVerse tokens are provided on an "as is" basis and without any warranties of any kind, either expressed or implied. You assume all responsibility and risk with respect to your use of the website and purchasing of any amount of the GivingVerse tokens and their use. If applicable law does not allow all or any part of the above limitation of liability to apply to you, the limitations will apply to you only to the extent permitted by applicable law. By acquiring GivingVerse's Token and to the extent permitted by applicable law, the buyer agrees not to hold GivingVerse's Token or any employee or contractor of GivingVerse liable for any losses or damages arising out of or in any way connected to the buyer's failure to properly secure the private key to the wallet containing their GivingVerse TOKENS: hacker's attacks, stolen devices, loss of passwords, etc.

No Representation & Warranties

GivingVerse and/or the Distributor does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in this Whitepaper.
